NEWS & NOTES

Private clinic installs region's first open MRI scanner

A NEW private healthcare facility in Peterborough, the Avicenna Clinic, has installed the region's first open MRI scanner which will be particularly useful for patients who suffer from claustrophobia or obesity. Dr Hany Elmadbouh, lead consultant and radiologist, said: "I am delighted that the Hitachi Open Scanner has been successfully installed in the practice and that patients will soon benefit from this highly in-demand facility."

"Avicenna Clinic will be a centre of excellence, specialising in minimally-invasive surgery, imaging and image-guided intervention techniques. Being the first clinic in the region to have the Hitachi Open MRI Scanner is just one example of the way we will be using the latest technology to provide the highest level of patient care here."

Avicenna Clinic is an independent, consultant-led private healthcare practice with 35 specialist consultants offering a range of specialisms such as general surgery, diagnostics and testing and spinal care. It is located on North Street in the centre of Peterborough.

Rutland Cycling is to open a visually stunning 10,000sq ft cycle centre at the new Everards Meadows country park, adjacent to Fosse Park, Leicester. The store, due to open in Spring 2018, will offer Rutland's unique model of hire, demo and retail in a newly-created country park, where purpose-built cycle trails and cycle skills loops will link to the traffic-free Grand Central Way into Leicester city centre. More than £1.6 million is being invested in the cycle centre and over 10 local jobs will be created by the new store, which will be Rutland's eleventh.

HEALTH

Health clinic installs an open MRI scanner

A new private health clinic has installed the first open MRI scanner in the region.

The Hitachi Open MRI facility is useful for patients who suffer from claustrophobia or who are obese.

Patients benefit from MRI scanning technology without experiencing anxiety or physical discomfort associated with the more usual enclosed imaging systems which typically have a tunnel-like scanning area.

The scanner is based at the Avicenna Clinic – a consultant-led private healthcare practice in North Street, Peterborough.

The new scanner

Dr Hany Elmadbouh, lead consultant and radiologist, said: "I am delighted that the Hitachi Open Scanner has been successfully installed in the practice and that patients will soon benefit from this highly in-demand facility."

Avicenna Clinic will specialise in minimally invasive surgery, imaging and image-guided intervention.
